OH-2710 USB MP3 AUDIO PLAYER

OVERVIEW

The OH-2710 is a compact MP3 audio player designed for On-Hold messaging and BGM systems in commercial installations requiring playback from a USB memory stick. The unit simply connects to any standard RCA or ¼" jack input and provides typical CD player style functionality ie.: play/pause and track skip. Line output level volume is adjustable via the side panel volume knob.

FEATURES

- Support MP3 folder hierarchy structure ie: will browse music inside folders on a memory stick
- Compact size
- Line level volume adjustment
- Simple plug and play operation
- Box flange allows mounting to any surface

OPERATION

The OH-2710 is compatible with USB flash memory sticks and memory cards (such as SD/SDHC/CF etc) when used in conjunction with a card reader.

1. Connect to 12V d.c. plugpack (supplied).
2. Connect RCA lead to player output and to your amplifier input.
3. Set volume level to minimum.
4. Press play to commence MP3 playback.
5. Adjust volume to desired level. The volume can also be adjusted using the ⏮ or ⏭ buttons. Hold either one down for one second to increase or decrease the volume in graduated steps.
6. To skip tracks, press the "PREV" OR "NEXT" buttons.
